

Dr Stefano Ursino is Medical Researcher in Radiation Oncology, Department of Translational Research and New Technologies in Medicine and Surgery at the University of Pisa.

He is teacher at the Specialization School of Radiotherapy and at the degree course in Medical Radiology, Imaging and Radiotherapy Techniques.

HONOURS AND MEMBERSHIPS

- Member of the Italian Association of Oncological Radiotherapy and Radiobiology (AIRO-AIRB)
- Member of the executive board of the Head and Neck Study Group of AIRO from 2015 to 2017
- Vice-coordinator of the Head and Neck Study Group of AIRO from 2017 to 2019
- Member of the Editorial Board for the following scientific journals:
 - Frontiers In Oncology (Section of Radiation Oncology)
 - Cancers
 - Clinics in Oncology
 - Journal of Clinical Trials in Oncology
 - Insights in Head and Neck Cancer
- Activity of peer-reviewer for Head&Neck, Plos One, Medical Oncology, Supportive Care in Cancer

RESEARCH PROJECT

- **Principal Investigator and coordinator** of the Italian Multicenter Prospective Study “Clinical and Instrumental Evaluation of Late Dysphagia in patients with Oropharynx and Nasopharynx cancers candidates to combined radiochemotherapy with Intensity Modulated Radiotherapy (IMRT)” (Clinical Trial.gov ID NCT03448341)
- **Local Principal investigator** of the Italian Multicenter Prospective Study “ Quality of Life and psychological functioning in patients affected by head and neck cancers treated with curative intent” (Coordinator Center: Cancer National Institute of Milan)
- **Local Principal Investigator** of the Italian Multicenter National Study “Prognostic impact of 18 F-FDG PET in head and neck squamous cell carcinoma: a multicenter retrospective study on behalf of the Italian Associations of Radiation Oncology (AIRO) and Nuclear Medicine (AIMN)”
- **Local Principal Investigator** and member of the national steering committee of the AIRO multicenter prospective study “Non Elective Vulnerable Elderly Radiotherapy (NEVER)”

- **Local Principal Investigator** of the retrospective national study “TEXTure Analysis of PET/CT in lung cancer patients treated with Stereotactic Body Radiation Therapy” (Coordinator Center: Radiation Oncology Unit IRCSS Reggio Emilia)”
- **Co-investigator** in a athenaeum projects search (PRA) entitled “Biomarkers of anti EGFR inhibitors in metastatic colon-rectal cancer”
- **Co-investigator** in the project Bando Ricerca Salute 2018 “Thermoablation of Melanoma and Mammary Carcinoma with injected Nanoparticles coupled to Radiotherapy” (THERMINATOR)
- **Co-investigator** in the project entitled “LIBIOP” liquid biopsy in patient with oligometastatic prostate cancer treated with stereotactic radiotherapy (PORs FSE 2014-2020)”
